

Description:

pMD.G is a VSV-G envelope glycoprotein expression plasmid. It can be used for production of VSV-G-pseudotyped lentiviral particles.

Location of features:

hCMV promoter: 1-750

beta-globin intron: 801-1348

VSV-G: 1436-2971

beta-globin polyA: 3115-3895

Ampicillin resistance gene (AmpR): 4837-5697
